

Free Software

Inclusive Technology is offering free access to their 'Choose it Maker 3' and 'Games and Activities' software for 3 months. Some pupils in school, particularly those in the Base classes, have found these software packages to be enjoyable and useful learning tools.

Choose it Maker 3

This requires Adobe Flash Player to be loaded onto your computer. Adobe is free. Once you have set up an account, you will be able to create your own activities on a computer using pictures, symbols and words. Activities can be played on a computer or iPad. The app is available free from the App Store. There is a facility within 'Choose it Maker 3' to share activities you have made with others using a code. The school will soon share some codes to enable access to activities. If you would like to share an activity you have made – select the activity then select 'share'. This will generate a share code which can then be passed on. In order to access a code, select 'Redeem Code'.

Games and Activities

This can be played on a computer or iPad. Unlike 'Choose it Maker 3', there is no facility to create or adapt activities. On an iPad, the software is accessed using a browser rather than an app.

Setting up an account (this enables access to 'Choose it Maker 3' and 'Games and Activities')

An email address and password will be required to access the free resources.

Go to the Help Kidz Learn website - www.helpkidzlearn.com
